

HNMPA-(AM)? A cell-permeable analog of HNMPA that yields the parent compound upon cleavage by cytosolic esterases.

HNMPA-(AM)? A cell-permeable analog of HNMPA that yields the parent compound upon cleavage by cytosolic esterases.

Identificativi Prodotto

Reference: 397100-5MG

Descrizione

Dati Tecnici

CAS Number: 120944-03-8
Molecular Formula: C₂₀H₂₃O₁₀P
Shipped on ICE/no ICE: DICE
SAP Pack with Pack Qty: 1X5MG
Storage Temperature: -20C
